

WHY CHOOSE HOLIDAY CLUB ?

Dialysis cente

Struga, or the city of two waters as many travel writers like to call it, is a unique blend of natural beauties. History, tradition and cultural heritage intertwined with the diversity of ethnic influences provide each visitor with a different experience. It was in this city that, 46 years ago, with the enthusiasm of a group of young doctors, the idea of nephrology in Struga was born, or rather, it had its beginnings on September 7, 1978, when the first hemodialysis was successfully performed. Since 1984, it has been operating as the largest regional center for nephrology and urology, the only one of its kind at the secondary level in the country, immediately after the University Clinic for Nephrology.

Our team is sustained of good health care professionals who are motivated by a desire to serve and help others. They focus on patient needs in order to make meaningful differences in their lives.

Working in the health care field, the team is sensitive to our patient's needs while working towards the best outcomes.

**OUR HOSPITAL IS LOCATED
JUST 50 METERS FROM THE
BEAUTIFUL OHRID LAKE.**

**IT IS ONE OF THE EUROPE'S
DEEPEST AND OLDEST LAKES
WITH A UNIQUE AQUATIC
ECOSYSTEM OF

The Holiday Dialysis Club is an integral part of the Specialized Hospital for Nephrology in Struga. It is located on the coast of the beautiful Ohrid Lake.

The activity of the Institute includes several programmes: nephrology, urology, dialysis and rehabilitation.

The specialized medical staff with its rich experience and the modern equipment offer nephrourological services of high quality. The Polyclinic within the Institute has highly developed diagnostic methods as follows: echosonography, a complete biochemical, hematological and immunological laboratory, X-ray diagnostic, densitometry, etc.

For the patients who receive chronic hemo-dialysis we especially recommend the holiday-rehabilitation programme of the Hemodialysis Club "Fishermen House". It offers:

- An optimal highly skilled care
- Modern equipment
- Optimal climate conditions
- Possibility for physical therapy, hydrotherapy and integral medical, psychophysical and social rehabilitation.
